PROFILE

I'm a Web Developer and Software Test Engineer with experience in dynamic and static websites focused on accessibility, performance, and SEO. I've worked closely with backend developers, UI/UX teams, and QA to ensure high-quality deliverables across web platforms. My background includes developing responsive front-ends, managing CMS systems, performing software testing, and contributing to live streaming and branding/blog projects. I'm passionate about clean code, quality assurance, and continuous growth.

WORK EXPERIENCE

SQA Tester   Sept 2023 – Present

Project Based / Freelance

- Conducted manual and exploratory testing on web applications to identify bugs and ensure quality standards.
- Collaborated with developers and product teams to create test cases, document defects, and verify bug fixes.
- **Tools & Technologies:** Postman, Chrome DevTools, GitHub, Web Browsers, REST API.

Web Developer   Sept 2023 - Nov 2024

Central One Bataan, Ph Inc.

- My role involved cloning a website to sharpen my front-end skills and collaborating with teams via Git and GitHub. I independently developed both a static blog and a dynamic website, referencing a colleague's code. The dynamic site included CMS integration, login, and CRUD functionality, built on Node.js with MongoDB as the database.
- **Technologies & Tools:** WordPress, GraphQL, API integration, Hygraph, Next.js, Bootstrap, Postman, Node.js, Git, MongoDB, GitHub, SEO Tools, and Vercel.

Front-end UI Developer Intern   July - Sept 2023

- Cooperating with Designers and fellow Developers, I focused on front end, Using fetched data to display on front end.
- **Tools/Software used**: NextJS, SCSS, Postman, Redux, GitLab, and Git.

PROJECT EXPERIENCE

Blog Website - **Fullstack**

- Independently developed a static blog and a dynamic website with CMS features, user authentication, and CRUD functionality.
- **Tools/Software used:** Next.js, Node.js, Express, Tailwind CSS, REST API, Git, GitHub, Vercel, and Figma.

Sports Live Hub - **Full stack**

- Developed a live streaming platform focused on sports content. I was responsible for creating all pages and managing front-end development, ensuring a responsive, user-friendly interface. Integrated real-time streaming features, optimized performance, and collaborated on back-end functionalities to deliver a seamless viewing experience.
- **Tools/Software used:** Next.js, Tailwind CSS, REST API, Git, GitHub, AVA, and Figma.

Blog Website - Full Stack

- Independently develop a static and dynamic page website using next js with headless CMS wordpress.
- **Tools/Software used:** dNext.js, WordPress, ACF (Advanced Custom Fields), GraphQL, Tailwind CSS, REST API, Git, GitHub, and Vercel.
